

Instant Presentations Banner Lite

A Mac or Pc file should be supplied at half size

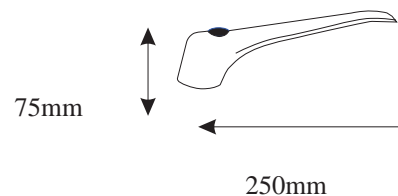

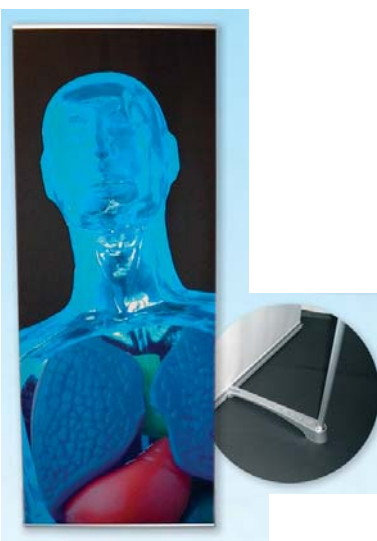

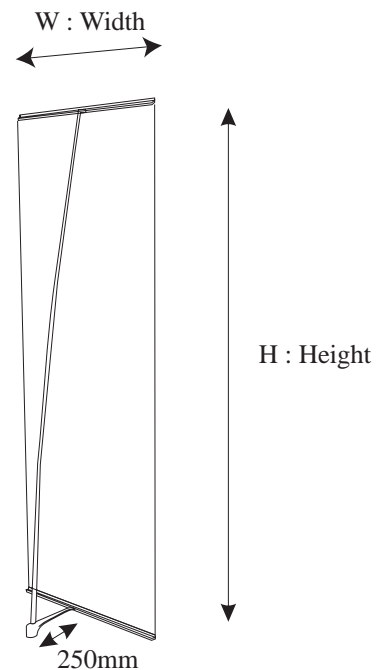

Scans should be set up in CMYK at approximately 300 dpi at 100% of the size in the document

Logo's should be supplied as vectors and as an eps

Remember to include any placed files when supplying the artwork along with a colour proof

Pantone colours cannot always be reproduced accurately on our cmyk systems so please advise of any critical colours and we will try to match them.

Ensure there is a minimum of 5mm bleed on your artwork

At under 2kg in weight and easy to set up our budget banner system with full colour graphics fitted offers you an extremely stable and very cost effective solution to your portable presentation requirements. Available in three sizes, 600x1800mm, 850x2150mm and 1000x2150mm this professional display tool offers the innovative feature of a flush edge display allowing the system to be connected seamlessly to similar systems by magnetic strips to form a large display wall for greater impact.
