Roll ups

A Mac or Pc file should be supplied at quarter size remember to add 150mm at the base (this is needed to attach to the system but will not necessarily be seen

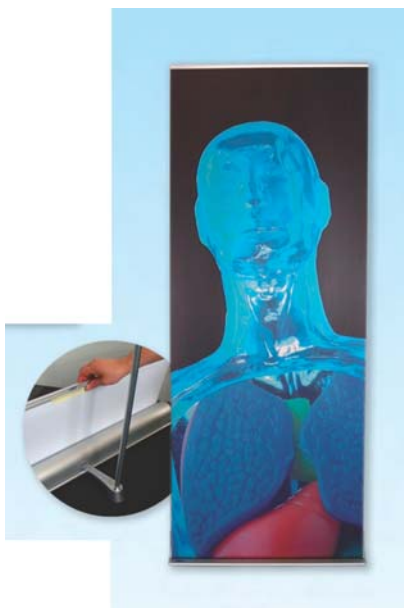

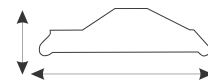

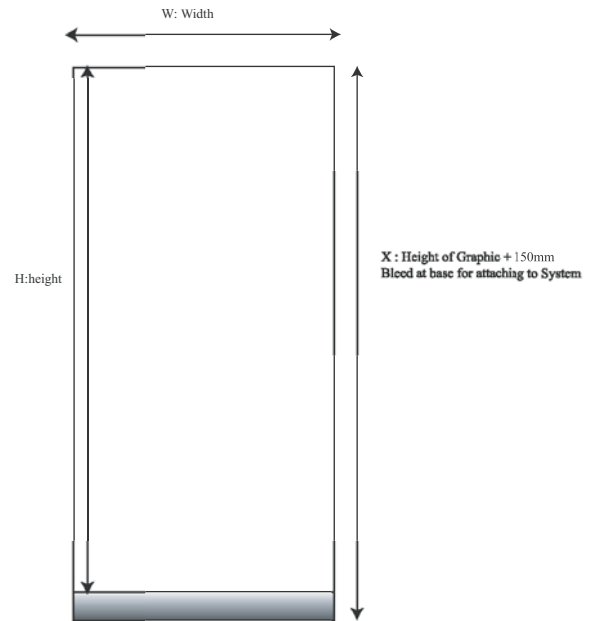

Scans should be set up in CMYK at approximately 300 dpi at 100% of the size in the document

Logo's should be supplied as vectors and as an eps

Remember to include any placed files when supplying the artwork along with a colour proof

Pantone colors cannot always be reproduced accurately on our cmyk systems so please advise of any critical colors and we will try to match them.

Ensure there is a minimum of 5mm bleed on your artwork

Manufactured in aluminium with a brushed silver finish the Mini Roll Up graphic display unit offers your graphics added protection during transportation. The pack consists of a base unit with full colour graphics fitted, a 3 parted pole with stabilising foot and padded transporter bag. This model is available in two sizes, 600x1800mm, 850x2150mm and 1000x2150mm All our Roll Up graphics **are produced on a plastic substrate to ensure continuous flexibility and durability when in use.** The base unit also allows graphics to be interchanged quite easily either within our offices or on site.
